

Weekly Progress Report

Name: Devwrat Gupta

Domain: Python Programming

Date of submission: 30/05/2026

Week Ending: 01

I. Overview:

This week, I mainly focused on understanding basic Python concepts and working on the **File Organizer** project. I learned how Python can be used to automate simple real-world tasks like organizing files into different folders based on their type. Along with the project work, I also explored the internship resources and practiced coding regularly.

This week, the primary focus was on understanding USC_TIA and contributing to Python projects. Additionally, efforts were made to leverage learning resources for skill enhancement.

II. Achievements:

1. USC_TIA Familiarization:

- Explored USC_TIA documentation to grasp core functionalities.
- Successfully executed basic tasks, showcasing initial proficiency.

2. Python Project Contributions:

Name of the project:- File Organizer

- Worked on a Python-based File Organizer project.
- Created a program that scans files from a folder and sorts them into different categories like Images, Videos, Documents, Audio, and Applications.
- Used Python modules such as os and shutil to handle folders and move files automatically.

- Improved the project by adding support for multiple file extensions and handling duplicate files.
- Contributed code to **File Organizer Project** with a focus on organizing files to the each separate file type folders.
- Engaged in effective collaboration with team members.

3.Learning Python:

- Learned concepts like loops, conditions, dictionaries, file handling, and modules.
- Understood the use of Python libraries such as **os** and **shutil**.
- Practiced writing and debugging Python code during project development.
- Applied Python skills to real-world problems within USC_TIA context.

III. Challenges:

1. USC_TIA Integration:

- Encountered challenges during USC_TIA integration with [mention specific component/tool].
- Ongoing efforts to troubleshoot and ensure successful integration.

2. Python Project Complexity:

- Faced complexity in understanding file paths and how file extensions work of the Python project.
- Got confused with indentation and folder handling in Python.
- Seeking guidance to overcome challenges and enhance understanding.

IV. Learning Resources:

1. USC_TIA Documentation:

- Utilized USC_TIA official documentation for reference and troubleshooting.
- Attended relevant webinars and online tutorials to deepen understanding.

2. Python Learning Resources:

- Referred to internship videos and online Python tutorials for learning.
- Practiced small Python programs to improve understanding of file handling and automation.
- Used documentation and coding examples for troubleshooting errors.
- Participated in [mention coding challenges or forums] for practical application.

V. Next Week's Goals:

1. USC_TIA Enhancement:

- Address integration challenges and explore advanced USC_TIA features.
- Collaborate with peers to contribute to USC_TIA improvement discussions.

2. Python Project Development:

- Plan to improve the File Organizer project further by supporting more file types.
- Continue learning Python concepts through practice and mini projects.
- Focus on writing cleaner and more efficient Python code.
- Seek feedback from mentors and peers for continuous improvement.

VI. Additional Comments:

This week helped me understand how Python can be used in practical projects. Working on the **File Organizer** project improved my confidence in coding and gave me hands-on experience with automation concepts.
